PROFESSIONAL SUMMARY

Versatile Software Engineer and Informatics Engineering graduate (GPA: 3.64/4.00) with hands-on experience developing web, mobile, and enterprise applications using C#, ASP.NET Core Web API (.NET 6+), Laravel, React.js, Flutter, and Microsoft SQL Server. Experienced in building and integrating RESTful APIs, designing relational database schemas (RDBMS), translating UI/UX design systems into responsive web components, authoring technical documentation and system design diagrams, and executing SIT/UAT alongside application security testing. Strong analytical, debugging, and problem-solving skills with a collaborative approach to delivering efficient, secure, and user-friendly software solutions across the SDLC.

EDUCATION

Universitas Pancasila **2022 - 2026**

Bachelor's Degree in Informatics Engineering (S.T.) | GPA: 3.64 / 4.00

- Organizational Experience: Board Member, Division 1, IMATIKA FT-KMUP.

SMAIT Al-Madinah **2019 - 2022**

Social Sciences (IPS) Track

PROFESSIONAL EXPERIENCE

Front-End Developer & UI/UX Designer | *PT Vinix Seven Aurum* **2026**

- Developed and delivered responsive, modern web interfaces for WargaBersih, a digital neighborhood waste management platform that streamlines citizen reporting, fleet scheduling, and environmental status transparency.
- Built an interactive public landing page and environmental dashboard using JavaScript, jQuery, and modern UI components to visualize RT/RW statistical metrics and automated regional waste collection schedules.
- Engineered the front-end integration for the Digital Waste Ticketing Flow (photo uploads and geolocation tagging) and Real-time Notification & Status Tracking connected via RESTful APIs and relational databases.
- Translated structured Figma component design systems into reusable, high-performance web layouts, while preparing user flow diagrams, technical documentation, and supporting SIT/UAT testing cycles.

Software & Mobile Application Developer | *PT Indotech Energi Persada* **2025**

- Designed, developed, and maintained interactive full-stack web applications and operational modules using C# (.NET 6), ASP.NET Core Web API, JavaScript (jQuery), React.js, HTML, and CSS to support operational workflows.
- Developed a cross-platform Flutter mobile application to facilitate efficient task recording and management, integrating secure RESTful APIs and user authentication modules for real-time data synchronization across web and mobile devices.
- Managed Microsoft SQL Server and MySQL databases, including relational schema design, DDL/DML queries, stored procedures, and query performance tuning.
- Performed debugging, troubleshooting, and code optimization while managing source code collaboratively via Git version control.
- Authored technical documentation and system design diagrams (ERD, UML, flowcharts), and executed System Integration Testing (SIT), User Acceptance Testing (UAT), and application security testing prior to deployment.

PROJECTS & PORTFOLIO

Fire Extinguisher (APAR) Management & Compliance Monitoring System – PD Anugrah Utama **2026**

- **Tech Stack:** *C# / .NET Web API Architecture, Laravel, PHP, SQL Database, Tailwind CSS, Git*
- Built a web-based information system for PD Anugrah Utama to track, monitor, and manage the condition and compliance data of Portable Fire Extinguishers (APAR).
- Designed the RDBMS schema, prepared full technical documentation and system diagrams (UML/ERD), and conducted SIT and UAT cycles with administrators to ensure reliability and security.

On-Demand Car Service & Maintenance Mobile App – MOBENG **2024**

- **Role:** *UI/UX Designer & System Flow Architect* | **Tools:** *Figma, System Flowchart, Component Design System*
- Designed end-to-end UI and UX workflows for an on-demand periodic car maintenance and oil change booking application, covering multi-step service reservations, transparent cost estimation packages, and real-time technician tracking.
- Built a structured design system with reusable components in Figma and documented comprehensive system interaction flows to streamline front-end and API integration for the development team.

TECHNICAL SKILLS

- **Back-End Development:** C#, .NET 6+, ASP.NET Core Web API, Entity Framework Core, LINQ, PHP (Laravel), Python, RESTful API, JSON, Authentication & Authorization
- **Database Management:** Microsoft SQL Server, MySQL, RDBMS, T-SQL (Queries, DML, DDL, Stored Procedures, Query Optimization), Database Schema Design
- **Front-End & Mobile:** JavaScript (ES6+), jQuery, Telerik Kendo UI, React.js, Flutter, HTML5, CSS3, Tailwind CSS, Responsive Web Design
- **System Design, UI/UX & Testing:** RESTful API Integration, Swagger/OpenAPI, System Integration Testing (SIT), User Acceptance Testing (UAT), Security Testing Basics, System Diagrams (UML, ERD, Flowcharts), Technical Documentation, Component Design System (Figma)
- **Tools & Practices:** Git (Version Control), Redis, Postman, Visual Studio, VS Code, Draw.io, Figma, Canva, Office 365, Debugging & Troubleshooting, SDLC

CERTIFICATIONS & TRAINING

- BNSP Competency Certification: Analis Sistem (Systems Analyst) – LSP Informatika (2026, valid until 2029)
- English Proficiency Test – LIA (Score: 517, 2026, valid until 2027)
- 12th AIFED Visual Data Storytelling Competition (2023) – Ministry of Finance
- Techno IT & Organizational Class (Kelas Organisasi) – IMATIKA FT-KMUP

LANGUAGES

- Indonesian: Native speaker
- English: Limited working proficiency
